PROFESSIONAL SUMMARY

CS undergraduate who took a self-built product, MoodNest.in, from idea to a live platform onboarding 20+ organizers across 6+ Indian cities — deciding what to build, integrating third-party APIs (Cashfree, Google Places), and coordinating directly with organizers as stakeholders. Also built production APIs alongside a live engineering team at Webpoint Solutions, and coordinated with an external engineering team on system architecture for the Obsidian Intelligence System. Targeting a Product Management internship to bring this build-and-decide experience to product strategy and execution.

TECHNICAL SKILLS

Programming Languages: Java , JavaScript, SQL

Backend & Databases: Node.js, Express.js, MongoDB, REST APIs, JWT Authentication

Frontend: React.js, HTML, CSS, Progressive Web Apps (PWA)

DevOps & Tools: Git, GitHub, Postman, Linux, Vercel, Render

Cloud & APIs: AWS, Google Cloud, Google Places API

EDUCATION

Vellore Institute of Technology

Bachelor of Technology – Computer Science & Engineering

2023 – 2027

CGPA: 7.4/10

EXPERIENCE

Software Intern — Webpoint Solutions *Mar 2026 – Apr 2026*

- Built REST APIs with **Node.js**, **Express.js**, and **MongoDB** that power core backend modules for enterprise ERP and LMS platforms.
- Added **JWT authentication** and **Role-Based Access Control (RBAC)**, isolating access across student, faculty, and administrator users.
- Paired with senior engineers on production backend features, tightening data models and writing clean API documentation.

PROJECTS

MoodNest.in — Live Event Ticketing Platform (MERN Stack) *Jan 2026 – Present*

- Built and shipped an end-to-end event discovery and ticketing platform, onboarding **20+ organizers** across **6+ Indian cities** (moodnest.in).
- Ran real-time ticket inventory and QR-based entry validation for **30+ live events**, covering **1,000+ attendees**.
- Integrated **Cashfree Payments** for transactions and built an offline-capable PWA with **Google Places API**, preventing duplicate bookings at venue search.

Obsidian Intelligence System — Client Automation Engine (Python) *Jul 2026*

- Built a Python automation pipeline pulling client data and meeting intelligence from **Fireflies.ai**, **HubSpot**, and **Outlook** into structured Obsidian knowledge vaults.
- Integrated **Fireflies.ai** and **HubSpot APIs** independently, coordinating with an external engineering team on system architecture.
- Found and documented **Azure AD tenant restrictions** blocking Outlook API access, keeping stakeholders informed with clear reporting.

ACHIEVEMENTS

- NPTEL Course Topper:** Top percentile in **Marketing Analytics**, IIT Kharagpur (2026).
- MSME Idea Hackathon 6.0:** Shortlisted for the Host Institute Screening Round at MANIT Bhopal (2026).
- Adani Group Vande Bharatam:** Shortlisted for Round 1 of the nationwide entrepreneurship initiative (2026).

EXTRACURRICULAR ACTIVITIES

- Core Team Member – AdvITya 2025** (VIT Bhopal's annual techno-cultural fest): Coordinated event planning, technical logistics, and on-ground operational execution across the event.
